KUNZWEILER FAMILY OWNED AND OPERATED SINCE 1962

## Kevin Kunzweiler is excited about the latest happenings at CP

Yes, a lot has been happening here at Cabinets Plus. First of all, I want to share with you why this is such a good time to remodel your home. Many of our suppliers are continuing to hold the line on costs because of the economy. Our labor rates have not increased in three years. Countertop prices have never been this competitive. Even cabinet manufacturers are offering discounts on some upgrades. The current trend in TV "Home Decorating" shows and many "Home" publications are bringing us clients who are educated and excited about their project. These are a few of the reasons that we continue to be busy providing quality work for our friends in the Northwest suburbs.

Our free educational seminars have been well attended. A series of evening bath seminars that we hosted in our showroom have just concluded. Now we're excited about our latest upcoming program "Trends in Kitchen Design" that we are co hosting with Novak and Parker Appliances in Mt. Prospect. We have been collaborating with Novak and Parker for many years. Details about this fun evening event are outlined on the last page of the newsletter.

More news... Mouser Custom Cabinetry is now offering closet systems. Look for more information about our new closet and dressing room cabinetry and upcoming showroom display on the back page.

On the inside center spread, we're featuring a bath designed by my brother Steve that appeared in "Designer Baths" 2009.

There's a lot happening here. Stop by or call anytime to talk with us about your remodeling project.

All the best, Kevin Kunzweiler VP

## BATH SEMINARS MADE A BIG SPLASH

Kent Kunzweiler (above) welcomes a group of seminar attendees to Cabinets Plus.

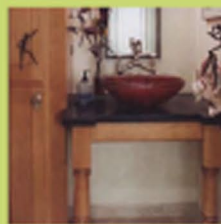

Dave Kunzweiler developed the Kitchen and Bath seminar programs in 2004. You may have attended one of the original programs "So You Want to Remodel Your Kitchen" at one of the local libraries. We've continued the tradition in our showroom for the last year. Melissa Wilson, CBD (Certified Bath Designer) now runs the Bath seminars with owner Kent

Melissa Wilson explains the bath remodeling process to a class of eager listeners.

Kunzweiler. The programs have been well received by the public as both educational and entertaining.

### \*Our eNEWSLETTER series "Planning Your New Bath" is Here\*

The owners envisioned a light, but warm, more open space with an oversized custom shower and better storage solutions at the vanity area. To accomplish this the designers removed a section of wall, the original five foot tub and the closet that adjoined it.

Framed mirrors and a spacious custom medicine cabinet provide a pleasing focal point in this master suite. Golden maple cabinetry, tile

flooring and a granite countertop create a traditional all-American style in America's heartland. Satin finish fixtures, faucets and cabinetry hardware bring a modern look to the classic style.

The oversized shower features a stone mosaic wall accent, and custom tile with a granite threshold and seat. The heavy custom glass enclosure is finished with a satin header and hinges. A personal shower system includes an in-wall diverter.

**Products Used:** Mouser Custom cabinetry, Heartland door style, maple with Burnished Tawny finish; New Venetian Gold granite countertops, shower threshold and built-in seat top; DaTile Cappriccio flooring in Forte Noce; American Standard Iris brushed nickel faucets and shower set, Studio basins in Linen, and Cadet toilet.

or call at 847.358.0143

Hear about the latest in kitchen design and appliances while enjoying some scrumptious appetizers prepared fresh by Chef Dave of Dave's Specialty Foods.

## Closet and Dressing Room Cabinetry

We're excited to announce that our first *Mouser Custom Cabinetry* closet display will be featured in the showroom later this fall. Keeping the client's storage needs as a priority, the new designs incorporate the latest in interior storage accessories to maximize the space available in both small and large environments. Our closet and dressing room cabinetry is being offered at three distinct price levels in an effort to meet a wide range of budgets.

## TIPS AND HINTS CLEANING WOOD CABINETRY

Cleaning wood kitchen cabinetry is really as easy as 1,2,3. Don't fall for the idea that "you need special cleaners" or "secret" solutions to clean your cabinets. Cleaning also rarely depends on the type of finish that is on your cabinets—really. Use a clean soft cloth and mild soap solution sparingly (Dawn dishwashing liquid cuts grease well or Ivory liquid is a reliable general cleaner), rinse with clear water and buff dry. Be careful not to leave any standing water on any wood surface. Annually, polish your cabinets with a furniture polish like Guardsman. This will revitalize your cabinet's finish. It's that simple.
